ACTi's new software application, NVR 2.2 is now ready for release. It is the first FREE 64-channels management software supporting MJPEG, MPEG4 and the most efficient compression standard - H.264, on the current market.

NVR 2.2 supports ACTi full product lineup, Box/ Bullet/ Fixed Dome/ PTZ/ Speed Domes with resolution from VGA up to Megapixel and allows users to do real-time live view, recording and playback with simultaneous 64ch window display. With the enhancement of overall control management, NVR 2.2 empowers users a smooth and fast operating speed while processing multiple tasks at the same time.

ACTi is the only IP camera manufacturer offering free 64-channel software. The complete unified solution including full line of hardware devices and management software enables customers to easily enjoy anytime/ anywhere video monitoring without any extra charge.

Other key feature enhancements along with the formal release of NVR 2.2 are highlighted as the followings.

- 1. Auto Upgrade** - For current NVR 2.1 users, NVR 2.2 automatically backups and restores previous settings while installing the new version. (Please must download the "Security-Patch" from ACTi website and execute the program along with the installation of NVR 2.2 to complete the upgrade process)
- 2. Supports New OS** - Supports Windows XP SP3 and Windows Vista SP1
- 3. Supports ACTi New Products** – PTZ Camera (ACM-8511/ACM-8211), H.264 IP Camera (TCM-4300), 35x IP Speed Dome (CAM-6630) and Quad Video Server(ACD-2000Q)
- 4. Enhanced Playback Speed Control** - NVR 2.2 is capable of producing smooth video quality for viewers on fast-forward mode (x2 or x4 control speed) without any delay issues.
- 5. Event ID Supported** – To complement the existing functionality for video display, NVR 2.2 is able to include event ID shown on pop-up window, playback video archives and snapshot pictures to specify "where" and "when" the event occurred.
- 6. AccessKey to Maintain Image Aspect Ratio**- Videos are displayed in full window by default, yet now users can use accesskey "CTRL+F6" to maintain the image shown in original aspect ratio.
- 7. Export Video in AVI format or JPEG Files** – Media Converter v2.2 exports raw video files in AVI format, which users can use Windows Media Player to play specific video required without any extra codec installation. Exporting as a series of JPEF files are also supported.
- 8. Enhanced Digital Zoom Operation**- This feature introduces a new zoom in/out operation of better efficiency. Instead of scrolling the mouse, now users can zoom in/out by simply clicking the "+" and "-" sign shown in the center of the video.

About ACTi

ACTi Corporation is the technology leader in IP surveillance, focusing on multiple security surveillance market segments. ACTi's extensive technology innovations in the development of JPEG/MPEG-4/H.264 has empowered ACTi's worldwide partners and customers to enjoy best quality video performances from VGA up to Megapixel resolution at minimum bandwidth. The core value of ACTi is the ability to develop, integrate and market complete end-to-end solutions for our clients in the IP surveillance market. ACTi's technology advancements enable complete solution offerings to cover all segments of the security market. Not only offering the IP surveillance hardware such as IP cameras and video servers, all ACTi products are bundled with free management software; in addition to the rich selection of management applications offered by leading Independent Software Vendors that support ACTi hardware.

ACTi partners with distributors, application developers worldwide; with flexible customization offerings to accommodate different business models. ACTi's commitment to sales, marketing and technical support will empower this innovative IP surveillance technology to be thoroughly optimized and appreciated by ACTi's strategic customers.
