The bright lights of Las Vegas brought the security industry together for another exciting year at ISC West 2009. Among the many vendors, a familiar butterfly stood out. Constantly bustling with excitement and drawing thousands of guests from across the globe, ACTi's booth was the busiest and brightest. We are pleased to announce that Steve Hunt with SecurityDreamer awarded the ACTi booth "Best of Show" at ISC West, 2009. We invite you to visit www.securitydreamer.com and see what Steve has to say about ACTi. We are extremely pleased receive high accolades from a much respected member of the security industry. Full of bright lights and clean lines, the booth connected ACTi and its guests in a shared vision of opportunity.

Our sleek booth design allowed us to reunite with customers, partners and friends while showcasing our unified IP surveillance solution. By far our TCM-5311 received many praises for its stunning picture quality. With a 1.3 Megapixel CCD and H.264 compression, the TCM-5311 even had our competitors stopping by to take a peek. In addition to our complete IP surveillance solution, our ACTi team showcased our devotion to all of our customers by highlighting ACTi's "Always Engaged, Always Winning" strategy. At every step, our team constantly strives to build successful partnerships within the security industry. From our ACE Training program for systems integrators to our Partner Zone for security consultants and engineering firms, ACTi is dedicated to sustaining a cost effective high quality IP surveillance solution.

ISC West was a great show this year and we are extremely grateful for everyone who took time to visit with us. Everyone at ACTi anticipates a successful 2009 where all of our partners, integrators, consultants and engineering firms are able to benefit from ACTi's full range of IP surveillance solutions. Thank you for your continued support; we could not do it without you!

About ACTi

ACTi Corporation is the technology leader in IP surveillance, focusing on multiple security surveillance market segments. ACTi's extensive technology innovations in the development of JPEG/MPEG-4/H.264 has empowered ACTi's worldwide partners and customers to enjoy best quality video performances from VGA up to Megapixel resolution at minimum bandwidth. The core value of ACTi is the ability to develop, integrate and market complete end-to-end solutions for our clients in the IP surveillance market. ACTi's technology advancements enable complete solution offerings to cover all segments of the security market. Not only offering the IP surveillance hardware such as IP cameras and video servers, all ACTi products are bundled with free management software; in addition to the rich selection of management applications offered by leading Independent Software Vendors that support ACTi hardware.

ACTi partners with distributors, application developers worldwide; with flexible customization offerings to accommodate different business models. ACTi's commitment to sales, marketing and technical support will empower this innovative IP surveillance technology to be thoroughly optimized and appreciated by ACTi's strategic customers.
