Traditional CCTV Cameras are passive devices that see, but cannot act. ACTi Event Handler system turns our IP cameras into active partners in your security solution. Make your cameras smart and active simply by upgrading to our new firmware. Coming soon.

Traditional CCTV Cameras are passive devices. They see, but cannot act. Whether all's quiet or something's afoot, they remain hapless observers. ACTi's Event Handler system turns our IP cameras into active partners in your security solution.

Event Handler is a software package that is integrated to camera firmware. Our customers do not have to replace existing cameras in order to make them smarter- they simply need to download and install a new firmware, for free.

Some of the ACTi Event Handler functions are very innovative- no other IP- camera manufacturer has them yet.
