ACTi releases the new video clip for ACTi Event Handler, to help our customer know more about this useful software engine. In this video clip, three features are highlighted: Snapshot, Auto-Switch, and Swivel to PTZ. First of all, the camera can do the snapshot instantly as long as the event is detected. User will receive the picture via email or smart phone. Second, Event Handler makes the camera switch automatically according to different setting upon digital input. Third, the camera can trigger the alarm and start recording once the event is detected.

The surveillance system will be more efficient with ACTi Event Handler. Users just need to do easy and quick set-up to make your IP cameras into your great surveillance partner.

About ACTi Event Handler

Traditional CCTV Cameras are passive devices. They see, but cannot act. Whether all's quiet or something's afoot, they remain hapless observers. ACTi's Event Handler system turns our IP cameras into active partners in your security solution.

Event Handler is a rule-based software engine that is embedded into device firmware. Users do not have to replace existing cameras in order to make them smarter – they simply need to download and install a new firmware, for free.

About ACTi

ACTi Corporation is the technology leader in IP surveillance, focusing on multiple security surveillance market segments. ACTi's extensive technology innovations in the development of JPEG/MPEG-4/H.264 has empowered ACTi's worldwide partners and customers to enjoy best quality video performances from VGA up to Megapixel resolution at minimum bandwidth. The core value of ACTi is the ability to develop, integrate and market complete end-to-end solutions for our clients in the IP surveillance market. ACTi's technology advancements enable complete solution offerings to cover all segments of the security market. Not only offering the IP surveillance hardware such as IP cameras and video servers, all ACTi products are bundled with free management software; in addition to the rich selection of management applications offered by leading Independent Software Vendors that support ACTi hardware.

ACTi partners with distributors, application developers worldwide; with flexible customization offerings to accommodate different business models. ACTi's commitment to sales, marketing and technical support will empower this innovative IP surveillance technology to be thoroughly optimized and appreciated by ACTi's strategic customers.
