Background

ACTi solution partner, ICCO Systems in Romania has successfully enhanced the security system for an important logistic company in Romania by ACTi megapixel IP cameras.

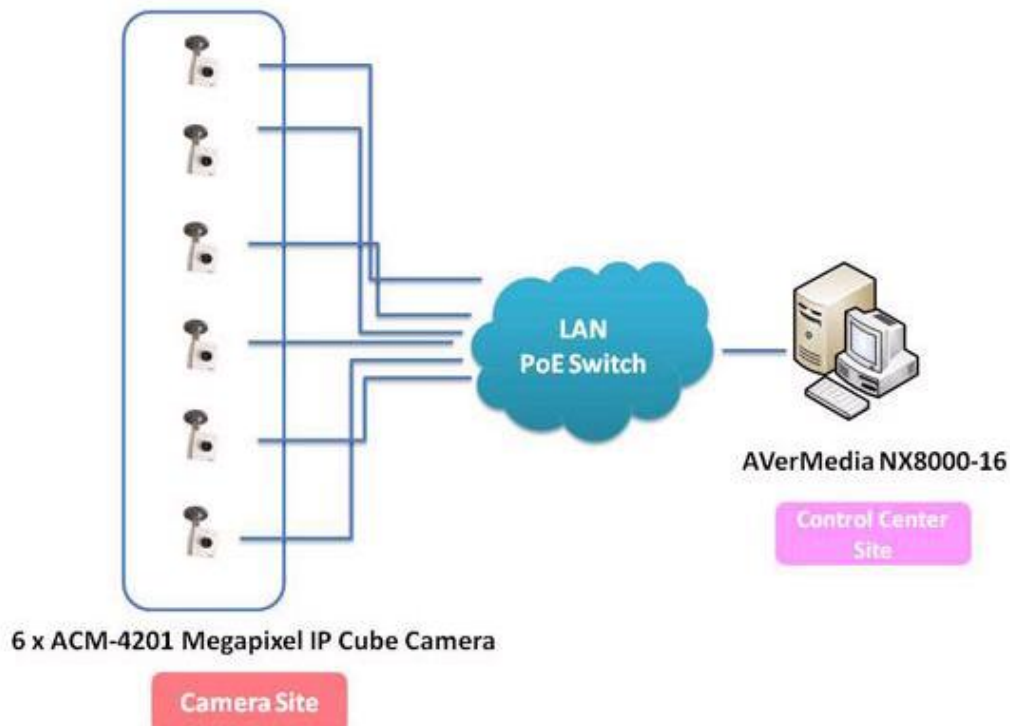

Solution

In the warehouse in Timisoara, there are existing analogue cameras with 4-ch DVR to secure the environment. However, to improve the system, the end user has decided to use megapixel IP cameras for docks - cargo handling areas for better image quality and easy cabling construction. Selecting from different brands and models of megapixel cameras, the decision finally went for **ACTi Megapixel IP Cube Camera ACM-4201** for this expansion. The reason for them to choose ACM-4201 is mainly because of the excellent image quality, competitive price, and the design of changeable lens. With suitable lens, ACTi ACM-4201 has performed stably and very clear video image.

Benefit

"For its excellent video quality and stability, the end user is very satisfied and decided to expand ACTi IP surveillance system into the rest of the warehouses," said from Mr. Adrian Ilea, the technical director in ICCO Systems.

About ACTi

ACTi Corporation is the technology leader in IP surveillance, focusing on multiple security surveillance market segments. ACTi's extensive technology innovations in the development of JPEG/MPEG-4/H.264 has empowered ACTi's worldwide partners and customers to enjoy best quality video performances from VGA up to Megapixel resolution at minimum bandwidth. The core value of ACTi is the ability to develop, integrate and market complete end-to-end solutions for our clients in the IP surveillance market. ACTi's technology advancements enable complete solution offerings to cover all segments of the security market. Not only offering the IP surveillance hardware such as IP cameras and video servers, all ACTi products are bundled with free management software; in addition to the rich selection of management applications offered by leading Independent Software Vendors that support ACTi hardware.

ACTi partners with distributors, application developers worldwide; with flexible customization offerings to accommodate different business models. ACTi's commitment to sales, marketing and technical support will empower this innovative IP surveillance technology to be thoroughly optimized and appreciated by ACTi's strategic customers.
