

ACTi and Milestone help Puopolo Smallgoods to successfully convert the existing analogue surveillance system to IP Surveillance Solution

ACTi's SED-2100R and Milestone's XProtect Software successfully help Puopolo Smallgoods, the meat processing factory, to convert their surveillance system from analogue to IP.

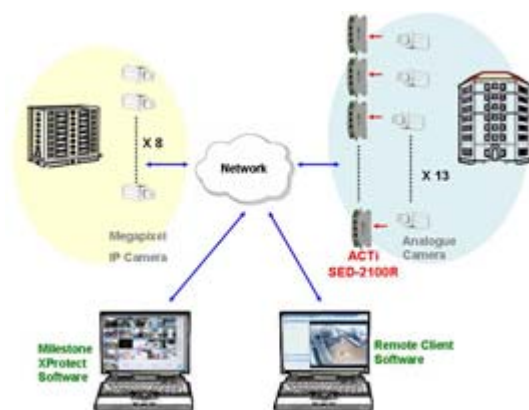

Puopolo Smallgoods is a meat processing factory in Victoria, Australia. The main purposes for Puopolo Smallgoods to initially setup the analogue surveillance system were to record the production process, prevent the accidents, and to strengthen the security.

However, as time goes by, Puopolo Smallgoods has now expanded with the addition of a new building. Alloys International and Unity Computers, assisted Puopolo Smallgoods to add more Megapixel IP Cameras in their new building. In addition, through the installation of ACTi SED-2100R, Puopolo Smallgoods can mix the existing 13 analogue cameras with new 8 IP Cameras in the new building via 1GB Cat6 link. The existing analogue system can also be easily integrated into the complete IP Surveillance Solution.

In terms of management, which is the significant issue in IP Surveillance Solution, Milestone's XProtect software plays an important role in this project. Due to Milestone's scalability and impressive performance, the customer now has full access to cameras in old manufacturing building and new manufacturing building from any PC on the network; therefore employees can have different levels of access through the entire complex via their PC's.

Implementing IP Surveillance Solution, the customer has the scope to add more IP cameras throughout the complex as required.

“ACTi's MPEG4 Video Server full D1 at 25 FPS with lower bandwidth helps us to convert analogue surveillance system to IP surveillance system.

Most importantly, ACTi products' decent frame rate and video quality are very impressive.” said by Michael Capuano, Business Development Manager at Unity Computers.

About ACTi

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance products and solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP-based Surveillance product line and provides one-stop-shopping convenience for IP surveillance solutions including MPEG-4 IP camera, video server, transcoder, and NVR. ACTi also offers management application software and SDKs for solution integrations. ACTi is the best choice and most reliable partner in the IP surveillance market. About Alloys Network Video Products Division

Alloys Network Video Products Division (AlloysNVP) is able to design a range of industry leading solutions including single to multi-site surveillance, anti-terrorism protection, and access control by providing ACTi and Milestone products. Please contact AlloysNVP www.alloysnvp.com.au for more technical advices and product demonstration.

About Unity Computers

Unity Computing Services specialises in IP security from the design stage to onsite implementation, with our focus on manufacturing warehousing and retail (medium to large scale) security requirements.
