

ACTi Utilized IP Technology to Empower City Monitoring in Brunei

ACTi's 8 CAM-5120 were set up in Brunei to do city monitoring and broadcast to the public. Since BruNET, an ISP in Brunei, provides the service on its website www.brunet.bn, people can easily view the live demo in 8 public areas.

Just click the place's name, you will know what happen

outside, such as if there are any traffic jams.

Through ACTi's CAM-5120, IP Day & Night Camera, customer doesn't need to worry about how to build up coaxial cables. Furthermore, from BruNET's point of view, after capturing the video from IP Camera, it will be directly transmitted onto internet, and then people can view the image on their website from anywhere.

Why did they choose ACTi? Due to ACTi's configurable video setting, ACTi's partner – AVANT successfully help BruNET complete this attentive service based on current bandwidth.

"Regarding to ACTi flexible video configurations, we can have the comfortable video quality at limited bandwidth" said Allan Hor, Director of AVANT. AVANT is the System Integrator who established the city monitoring in Brunei.

About ACTi

ACTi is a leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second.
