

## Telekom Malaysia Chooses ACTi for Training Center Security

Telekom Malaysia Berhad (TM) is the number one provider of information communication technologies in Malaysia. Recently they upgrade their surveillance with ACTi's IP surveillance solutions to protect students in their training center day and night. Due to the crime issues there, the system also provide higher security for their female students. It's not doubt the system provide more protection

for the assets and equipments in TM. The Project was carried out by Elite Communication, a System Integrator for EKTECH Consulting, the distributor of ACTi.

The coaxial cabling is lousy for TM because it will increase their cost for the deployment especially on coaxial cable constructions. Since TM provide telecom service in Malaysia, they are familiar with internet technology. Meanwhile their building comes with fiber infrastucture.

Network Infrastructure especially WAN, is available and bandwidth is not any issue for them so IP Surveillance system is the best choice for them.

As the training centers are spread out in 6 different locations throughout Malaysia, remote viewing is necessary to their management level without travelling around. TM also required the monitoring and recording in mutiple side including Security Guard Office, Security Director's Office and their Central Control Center at the same time. The analog or DVR system couldn't fulfill such requirements. Thanks to ACTi' ability to meet their requirements regarding cost efficiency, security, reliability and quality, TM decided to implement a fully IP Surveillnace Solution involving the installation of ACTi's outdoor IP Speed Dome, CAM-6210 and outdoor IP camera, CAM-5100H at multiple site across TM. They are also

satisfied with ACTi's free bundled software - ACTi Streaming Activator. Each IP Camera is accessible individually via username and password without requiring a central PC or DVR. Security personnel can easily survey any of the sites remotely and view the video at their PCs, wherever they work.

TM chose ACTi's IP Surveillance Solutions because it is easy for their deployment with ACTi's complete product line to fulfill different location demand. ACTi's superior video quality high compression ratio and high resolution is also essential for their decision making. TM also impressed with ACTi's cost-effective Outdoor High Speed Dome coming with professional design.

"We thank ACTi's high quality D1 IP video to secure our student's safety" said T. Zanal Abdin T. Muhamud, Technical Officer of Telekom Malaysia Berhad. "it is cost-effective compared to standard DVR solutions.

### **About ACTi**

ACTi is the leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP CCTV product line and provides one-stop-shopping convenience for IP surveillance solutions including but not limited to MPEG-4 IP camera, video server, transcoder, and NVR. ACTi also offers application software and SDKs. ACTi is the best choice and most reliable partner in the IP surveillance market.
