

## ACTi Enables IP Surveillance for Well-known Manufacturer in Taiwan

Motech Industries, Inc. (Motech) is a well-known manufacturer of solar cells based in Tainan, Taiwan. Due to rapid production line expansion, they have requested for a scalable and easily managed surveillance system for their new plants. ACTi's complete product

offering of versatile IP cameras, video servers, and NVR(network video recorders) fulfill their requirements.

Motech deploys DVR as the surveillance system for their first factory in Tainan Science Park. Since their new factory is far away from the first one, an IP surveillance solution is their best choice for solving

long-distance deployment issues. There is a total of 91 channels in this project, which results in Motech's request of diversified IP cameras at different sites. Four IP speed domes are installed in large areas such as the lobby and the back of the factory. The security guard can operate the control panel to discover the status easily in the gatehouse. Some other sites are equipped with standard IP cameras or day & night models in this six-floor building. ACTi also offers video servers to convert to digital video from the analog cameras in the first factory. The system is also fully integrated with ACTi's managing application software, the Streaming Activator and ACTi's Network Video Recoder(NVR). Thus Motech can easily manage, record, and monitor the two factories in a centralized fashion.

Motech chooses ACTi from many options because they are impressed with ACTi's live demonstration of professional video quality in Full D1 resolution at 30 frame per second. Furthermore, it consumes a bandwidth of merely 1.2 megabits per second, which in turn saves both bandwidth and storage cost. The NVR design is also a major benefit for Motech. ACTi's NVR allows 64 channels recording simultaneously, as well as allows the security guard to view recorded video from the NVR while it is recording.

#### **About ACTi**

ACTi is a leading product developer and manufacturer of MPEG-4 IP surveillance product solutions. ACTi is able to deliver MPEG-4 ASP compliant video streams at Full D1 resolution and 30/25 frames per second. ACTi offers the most complete IP CCTV product line and provides one-stop-shopping convenience for IP surveillance solutions including, but not limited to, MPEG-4 IP camera, video server, transcoder, and NVR. ACTi also offers application software and SDKs. ACTi is the best choice and most reliable partner in the IP surveillance market.
